# EXECUTIVE SUMMARY

# ABSTRACT

## FR 571

Dent rocks, break roots, be rude as hell to the trails. The FR 571 has all the features to defeat the black snake and crush canyon gaps in the desert. Attack the tracks in a 29" or 27.5" setup, rider's choice to go fully rude or business in the front, rude in the back.

No need to be polite, the included flat hex brass nipples are resistant enough for rough handling. Be bold and brazen with a silver rim or stay stealthy in black. Get the FR 571 and be rude as hell.

**DT** SWISS

# FR 571 FEATURES

## RIM PROFILE

The modification of the rim profile as well as the addition of material at specific places allows for increased resistance to impacts and pinch flats.

## SIZE OPTIONS

Ride in full 29", full 27.5" or mullet. The FR 571 is available in both sizes and 32 spoke count.

## NIPPLES & WASHERS

The FR 571 comes with brass nipples and PHR washers, resistant enough for rough handling.

## PERSONALIZE YOUR RIDE

The FR 571 comes in black or in a special silver color, as well as with three additional stickers.

## INCREASED IMPACT RESISTANCE

In order to increase the impact resistance even further, we used a similar design to the FR 560 rim. Years of experience and knowledge in aluminum rim development allowed DT Swiss engineers to develop an even more impact resistant rim. The profile of the FR 571 has had material added in specific areas, increasing the overall strength of the profile to create a rim adapted and durable to the practice of freeride and downhill.

■ **FR 560**

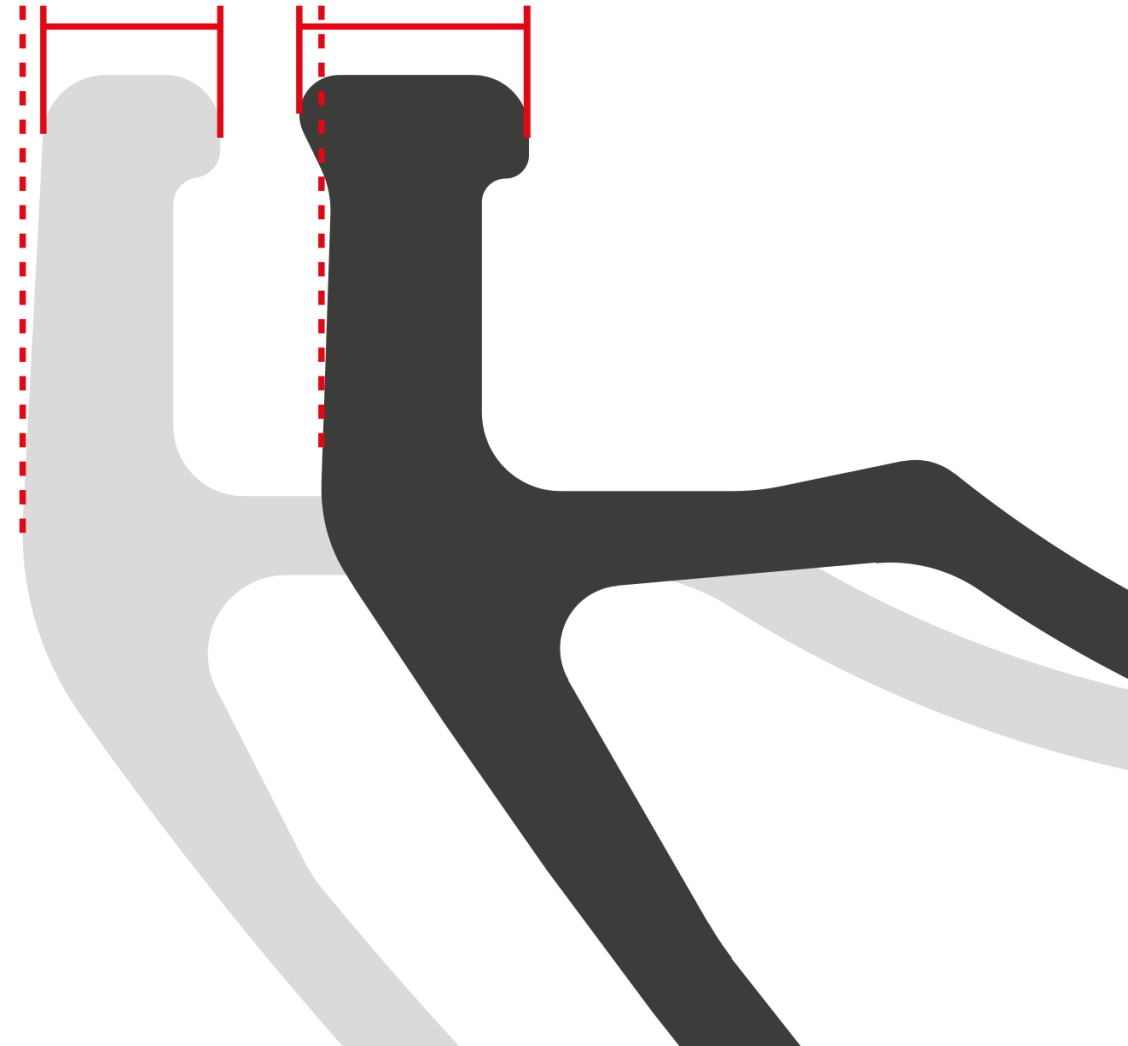

## BETTER PINCHFLAT PROTECTION

The FR 571 also benefits from a specific feature particularly adapted to its field of use: an increased protection against punctures by pinching. This feature is due to a new shape of the rim hooks where the upper part has been widened. It is precisely this sidewall that will come into contact with the tire during compression and in many cases, pierce the carcass causing air loss. The widening and correct orientation of this surface allows the shocks to be distributed over a wider area, thus reducing the risk of punctures.

## 3 STICKER COLOR OPTIONS

Change the design of your black FR 571 rim!

The black FR 571 rim comes with a red vinyl decal embodying DT Swiss. To fulfill the individual desires of ambitious cyclists, namely, to match the rim design to their bike, sticker variants in the colors, «gold», «black» and «silver» are included for self-application.

Instructions for self-application of the sticker: the high quality of the adhesive sticker enables easy application and ensures an optimal hold.

The silver FR 571 does not feature these color options.

# RIDER'S OPINION

**DT SWISS**

## PRO RIDER'S OPINION

«From the first ride, the FR 571 rim gave me the confidence to push harder. Whether it's rough, rocky terrain or high-speed compressions, this rim handles it all with ease. It feels incredibly solid under pressure, tracks predictably, and takes big hits without flinching.

What impressed me most was the balance between strength and ride feel. I could ride aggressively without worrying about tire issues or rim damage. It's the kind of gear that lets you focus on the ride, not the equipment.

The FR 571 is built for riders who don't hold back. It's tough, responsive, and ready for anything you throw at it.»
