EXECUTIVE **SUMMARY**

DT SWISS

SENSE OF INDEPENDENCE

You fasten your shoes, zip your jersey, clip your helmet - the quiet commitment kicks in. Long endurance loop, quick evening blast, steep gravel, busy city streets... whatever your mission is, you're ready for it. And now there's a companion built for that moment.

When the mountains swallow your signal or tunnels block your connection, this sleek rear-hub-optimized sidekick keeps counting. In partnership with Wahoo, we've built a speed sensor that translates every wheel rotation into pure accuracy, even where satellites tap out. No drops. No excuses.

Whether you track on a smartwatch or bike computer, this sensor delivers the edge your ambition deserves. A seamless fit, a clean look, a ride made more tangible and independent. Adventure doesn't stop when GPS does. Clip it on. Embrace the moment. Own the ride.

DT SWISS

TRACKR SPEED SENSE OF INDEPENDENCE / 7

THE DT SWISS TRACKR SPEED

Engineered on the reliable foundation of the Wahoo TRACKR SPEED, the DT Swiss TRACKR SPEED delivers identical performance with a distinct upgrade: a robust yet elegant DT Swiss housing and a modern rechargeable battery. Designed for convenience and durability, it eliminates the need for disposable batteries. Keeping you focused on your ride.

DESIGN & FIT

Partnering with Wahoo, we've built a rear hub optimized speed sensor convincing with its sleek, integrated design. Built for convenience and durability - so you stay focused on your ride.

RECHARGEABLE

The DT Swiss TRACKR SPEED is easy not only in attaching to the hub but also in recharging via a magnetic cable. Effortless application without a fuss.

COMPATIBILITY

ANT+ and Bluetooth allow for a wireless connection to your smartphones, smartwatch, or bike computer.

The DT Swiss TRACKR SPEED supports most road and gravel disc brake wheels featuring DICUT and SPLINE hub versions.

PRODUCT RATIONALE

LIMITATIONS OF GPS

GPS works by satellites (at least four) sending signals so your device can measure how far away they are. Using signals from several satellites, it finds your location with a few meters of accuracy. This can cause inaccurate data at times where the satellites can't locate you properly.

SENSE OF A SPEED SENSOR

In the speed sensor a 3-axis accelerometer is used to determine the rotation of the hub and thus your speed. A simple and elegant way to track your speed and distance without accessing GPS signals.

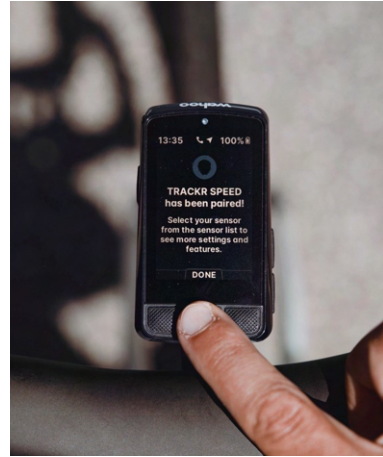

Whether you track on a smartwatch or bike computer, this sensor delivers the edge your ambition deserves. A seamless fit, a clean look, a ride made more tangible and independent. Clip it on. Embrace the moment.

JOURNEY OF INDEPENDENCE

You gear up and head out, ready for whatever ride lies ahead. Eventually, the route takes you through tunnels, mountains, or off-grid terrain, be ensured: the DT Swiss TRACKR SPEED keeps tracking every wheel rotation with precision. Seamlessly connected to your bike computer or smartwatch, it delivers reliable speed data when GPS can't. Wherever your adventure leads, you stay focused on the ride and not the signal.

**GET AND UNBOX
THE TRACKR SPEED**

**CONNECT TO POWER
AND PAIR INITIALLY**

**GO TO REAR HUB AND
PLACE AND CLIP IT**

**ONE CHARGE LASTS
UP TO 94 HOURS / 3000 KM**

**NO CONSTRAINTS, JUST
ENJOY YOUR RIDE**

PRODUCT
HIGHLIGHTS

PRODUCT VARIATIONS

The DT Swiss TRACKR SPEED is available for DICUT and SPLINE, keeping the clean, elegant yet fast design of the hub.

RECHARGEABLE

The DT Swiss TRACKR SPEED is easy in attaching to the hub but also in recharging via a magnetic cable. Effortless application without a fuss.

DESIGN AND COMPATIBILITY

The sleek and fitting design specifically rear hub optimized for our SPLINE and DICUT hubs. ANT+ and Bluetooth allow for a wireless connection to your smartphones, smartwatch, or bike computer.

Designed for broad compatibility, the DT Swiss TRACKR SPEED works with a wide range of current and previous road and gravel wheels.

Compatible with wheels include 1100 and 1400 level models in DICUT version, as well as wheels equipped with a 350 SPLINE hub. This coverage also extends to the recently launched 1800 series, ensuring compatibility across a large portion of the DT Swiss road and gravel wheel portfolio with disc brakes.

Visit our [PRODUCT SUPPORT](#) for a detailed compatibility check and confirm whether your wheel meets the requirements.
